Water challenges in Italy

The challenges for the coming years are:

1. Water safety
2. Climate change
3. Access to rivers and ports
4. Water quality

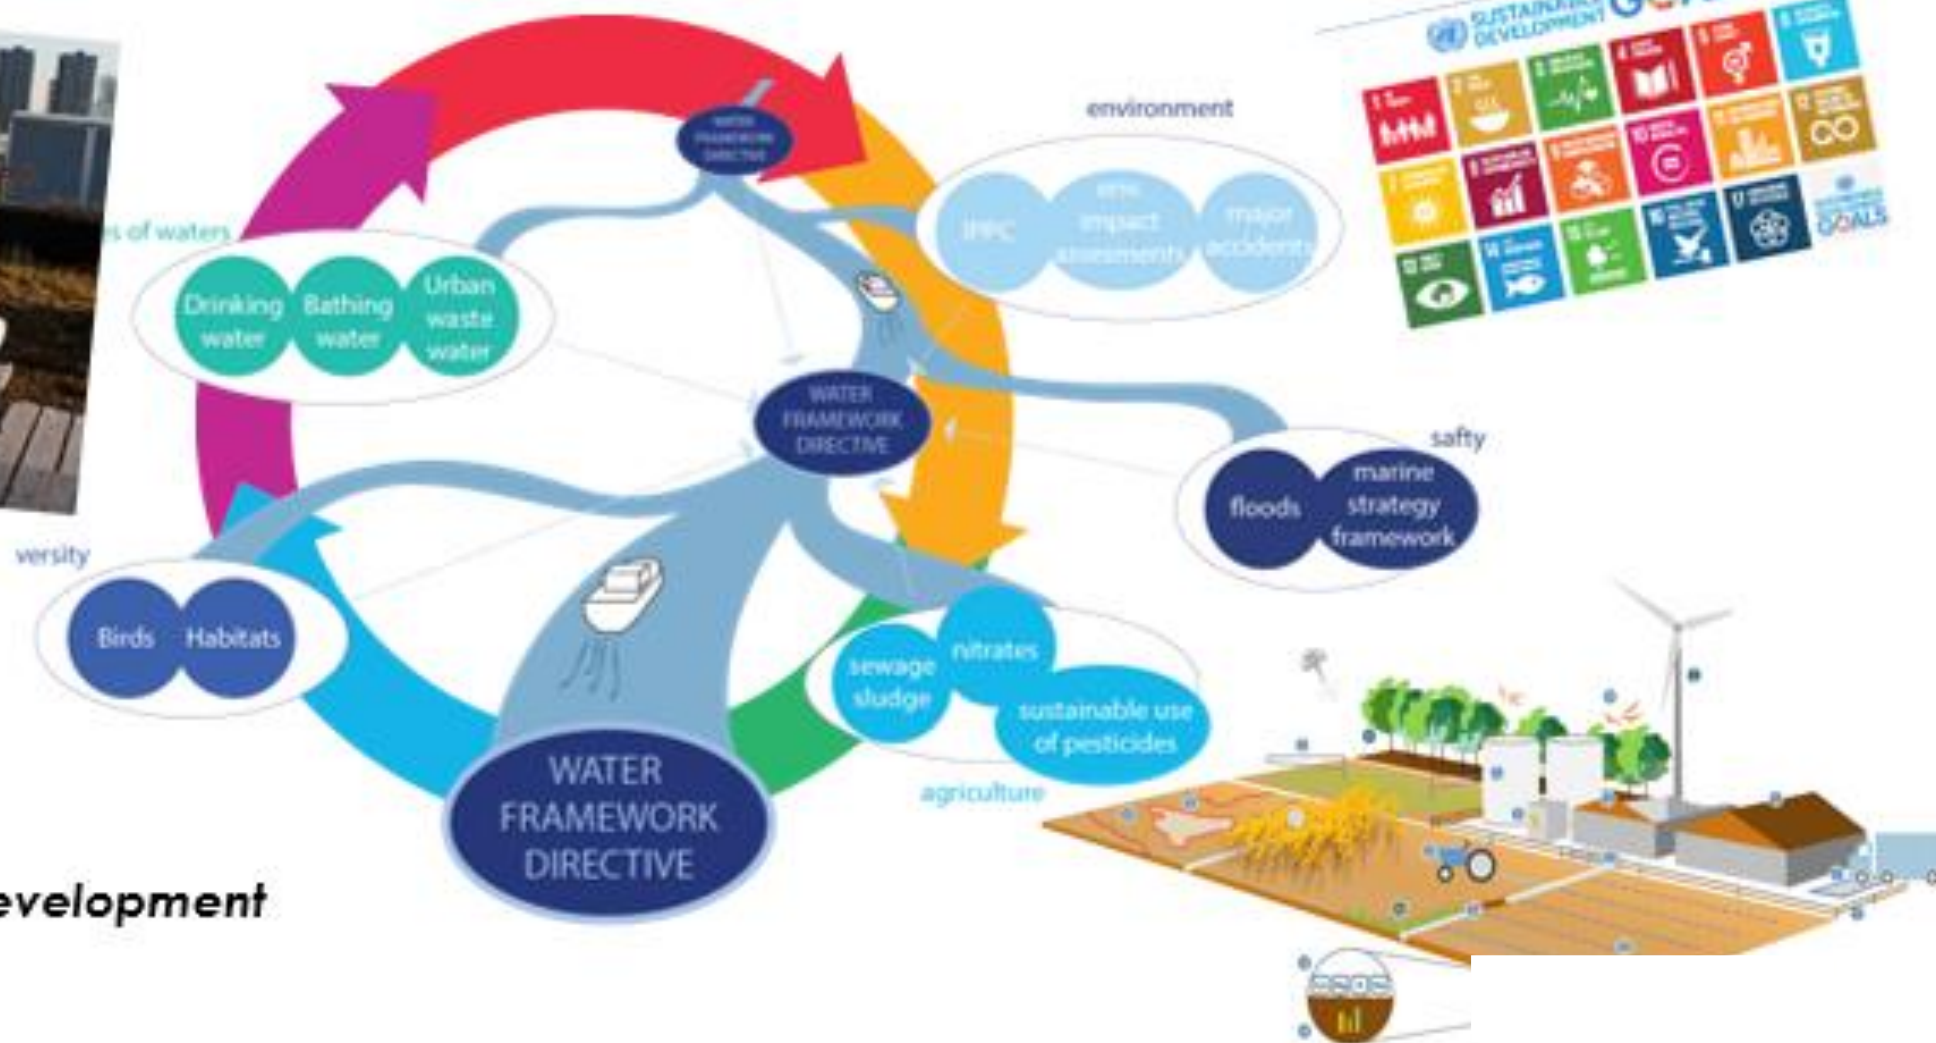

Opportunities for cooperation between Italy and the Netherlands are:

1. Innovative protection of coastal and riverways
2. Development of climate resilient cities and ports
3. Innovative wastewater treatment technologies for cities and industries including recovery of nutrients and fertilizers)
4. Recovery of water acquifers and soil quality

Cross- sectoral approach and themes

Water & City development

Port development
